Water Conservation Tier Rate Structure

Contact City Hall with any inquiries.

The City Council has voted to enact Conservation Tier Rate Structure to encourage residents to use less water during the summer months. Based on a Water Rate study, this rate structure change should not affect 73% of Falls City residents, who on average use less than 13,000 gallons of water per month.

On every water account the first 5,000 gallons of water is part of the monthly base cost.

5000 – 13,000 gals	13,000 – 26,000 gals	Over 26,000 gals
\$2.55 per 1000 gals	\$2.84 per 1000 gals	\$3.12 per 1000 gals

These rates will be increased 5% on July 1, 2026
